

MEDIA ADVISORY **U.S. Army Materiel Command**

FOR IMMEDIATE RELEASE

February 11, 2005

AMC showcases equipment, capabilities at annual AUSA meeting

FORT LAUDERDALE, Fla. – The U.S. Army Materiel Command will showcase key initiatives and equipment that will assist Warfighters in the Global War on Terrorism, at the Association of the U.S. Army Winter Symposium Feb. 16 through 18 in the Broward County Convention Center, Fort Lauderdale, Fla.

AMC's exhibit will feature several vehicles and equipment, including:

"HMMWV on Steroids," designed to meet the unique needs of the Special Forces and Army Rangers, this Ground Mobility Vehicle variant features nearly 100 options including weapon mounting alternatives and new armor concepts.

Airborne Communications Extender, an unmanned, untethered airship that operates at 7500 feet above ground and provides continuous communications relay for 24 to 36 hours.

Small Arms Smart Sight, the Warfighter's bridge to the future that applies the latest in fire-control technology to existing weapons systems, thereby enhancing Soldiers' capability to hit targets that they can see and targets they cannot see.

Large Medium Roll-on Ship, a rear mock-up of a ship with a ramp lowered to depict uploading of prepositioned equipment and materials for the Warfighter – a logistics concept that works.

In addition, AMC representatives will be on hand to discuss the Life Cycle Management Command initiative. Leadership and subject matter experts will also be available for interviews.
